 Last week, Air Force upped MIG-15 estimate to 220, on basis other information.

E. As to actual, rather than T/O totals, NKAF units usually under-strength and probable that difference between estimates and actuality is considerably less than 200.

II.

5th air division, (previously credited only with conventional aircraft) has MIG-15's in its T/O.

A. Possible that additional jets were given to the Koreans when Soviet air units withdrew from Yalu River area in late 1954.
